

series one™

stylish merchandising

Your key merchandising units will sit against the wall, and those influential pieces will set the tone for your entire dispensary. It's essential to choose one that communicates your attitude and speaks to the majority of your customers. So take a tour of our Style Gallery and see which feels right.

BASIC FACTS

All fixtures are manufactured to meet rigorous construction guidelines with state-of-the-art techniques, then carefully finished with the finest European hardware available. Standard sizes are 89 1/2" tall and 15 1/2" deep; widths include 18", 25", 32", 39" and 46". A wide range of high pressure laminates are offered with trims in alder, cherry, maple and oak.

DISPLAY OPTIONS

The short list includes acrylic and metal rods (locking or non-locking), feature panel systems, glass shelves, anti-theft displays, acrylic or glass shelves, and metal mesh with magnetic accessories. Sliding glass doors, showcase tops and special lighting are all part of the many options available.

DECISION MAKING

If you prefer a custom design or custom finishes, we are happy to build anything you want. But choosing one of these will save you time and money. And since color choices are nearly unlimited—as are backing and display options—your space will truly be unique.
